Migrate data between 2 Exchange Servers (local and/or remote). Compatible with Exchange 2003/2007/2010/2013/2016. Kernel Migrator for Exchange can be used to migrate mailboxes, public folders, Outlook profiles, global address lists and custom settings. In order to achieve this, the program creates a list of commands to be used at the command line. You can import items from the following types of data: Export/Import and create mailboxes Export/Import public folders Export and create Outlook profiles Export and create global address lists Export and create custom settings Import or export mailboxes Import or export public folders Import or export Outlook profiles Import or export global address lists Import or export custom settings EXCHANGEDescription:0.08 Safari Player for Windows (Safari for Windows) description: Apple's Safari Web Browser is a popular web browser for use on Mac OS X and Linux. With its powerful web engine, Safari Web Browser gives you the flexibility you need to browse web pages from Mac OS X and other operating systems. Safari is built on a modular architecture that lets you choose the components you want, and install them without replacing other components. This approach gives you the ability to customize your browser so that it fits your needs and provides you with a consistent web browsing experience. Safari is one of the world's most popular browsers and has been downloaded over 750 million times to date. Use it to explore the Web in Safari, search the Web in Google, read e-books in iBooks, watch movies and TV shows in iMovie and TV, listen to music in iTunes, and more. This Software is free but you may have to register, so that you can save your favorites list and can use bookmark. The application is not a spyware, nor does it gather any kind of data about your computer. Key Features of this Software: * Quickly find anything on the Web * Save web pages, in this way you can always find them again * Customize your web browser with powerful customization features * Integrate your favorite features, like plugins, bookmarks, RSS Feeds or RSS Feed Readers, playlists and more... * Create a catalog of the favorite websites you use * Select your favorite websites using a grid or a list view * Find and read bookmarks, pages or files you are interested in * Open, save
